What is hand hygiene?

According to Hand Hygiene Australia, effective hand hygiene practice is the single most important strategy in preventing the spread of infections or diseases associated with health care¹.

Research shows that when hand hygiene practices are performed correctly, there is a reduction in the presence of microorganisms on hands, and subsequently a reduction in transmissible infections¹. This includes common infection and superbugs such as MRSA².

Despite this, hand hygiene practices are generally poor among health care workers². It is suggested this may be due to:

- The time consuming nature of proper hand hygiene techniques
- Hands appear to be clean
- Problems with skin irritation
- Poor access to sinks or hand hygiene products

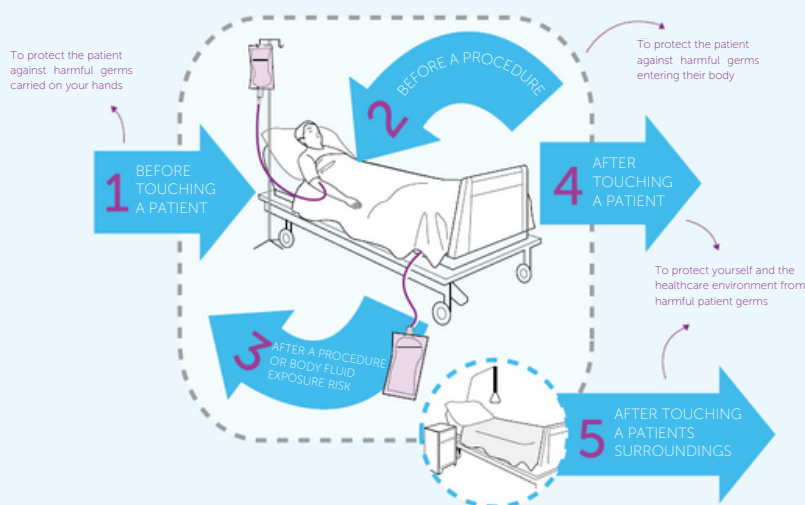

An effective hand hygiene program

An effective hand hygiene program includes a medical-grade hand wash and an alcohol-based hand rub⁴. Hand wash is to be used when hands are visibly soiled when combined with water and proper hand washing techniques, hand wash removes most microorganisms from hands⁵.

Alcohol-based hand rub is to be used after hand washing, or when hands are not visibly soiled. Alcohol-based hand rub eliminates microorganisms that have survived hand washing and neutralises tough bacteria⁵.

WHO 5 Moments of Hand Hygiene

The World Health Organisation (WHO) recommends hand hygiene be performed at five key moments⁶.

1. Hand Hygiene Australia (2015). What is hand hygiene? <https://www.hha.org.au/hand-hygiene/what-is-hand-hygiene>

2. NSW Government Department of Health (2012). Fact Sheet: Methicillin resistant Staphylococcus aureus (MRSA) in the community: Information for the public

3. Hand Hygiene Australia (2015). What is hand hygiene? <https://www.hha.org.au/hand-hygiene/what-is-hand-hygiene>

4. Centre for Disease Control and Prevention (2015). Hand Hygiene Basics <http://www.cdc.gov/handhygiene/Basics.html>

5. NSW Government Department of Health (2012). Fact Sheet: Methicillin resistant Staphylococcus aureus (MRSA) in the community: Information for the public

Hand and Body Wash

CLEAN

- Natural plant-based formulation
- Colour-free
- Fragrance-free
- Isothiazolinone- and Paraben-free
- Scientifically formulated with Colloidal Oatmeal to aid in rejuvenating your skin
- Biodegradable ingredients
- 100% recycled/recyclable 500ml bottle

Description:

PrimeOn™ Hand and Body Wash uses a colour-, fragrance- and paraben-free plant-based formulation, providing thorough cleaning and decontamination of hands both before and after clinical procedures, without harsh effects on the skin.

Made from biodegradable ingredients, including soothing and nourishing Colloidal Oatmeal, our Hand and Body wash is specifically formulated with sensitive skin in mind, with no isothiazolinones or residuals to minimise skin irritation, allowing you to care for the environment as well as your patients.

Application:

PrimeOn™ Hand and Body Wash should be used when hands are visibly dirty. Using the PrimeOn™ Hand and Body Wash in conjunction with proper hand washing techniques protects you, your patient and the health care environment from the impact of harmful germs or foreign bodies. The World Health Organisation⁷(WHO) recommends hands should be washed for a total of 40-60 seconds in every instance. PrimeOn™ Hand and Body Wash may also be used as a substitute for bath gel or liquid soap.

Sanitiser

SANITISE

- Fast-acting hand rub
- Suitable for use in hospitals
- Broad spectrum, kills germs
- Contains 70% alcohol v/v
- Complies with EN 1500
- Colour-free
- ARTG: AUST R 409074

Description:

PrimeOn™ Sanitiser is formulated as a TGA-regulated and registered, EN 1500*-compliant hand sanitiser, specially for use in a healthcare setting. With a crisp, light citrus fragrance and a non-greasy, residue-free formula, the PrimeOn™ Hand Sanitiser provides professional-level protection without the pungent odours, giving you peace of mind about your hand hygiene and infection control practices.

Our formulation is both colour-and paraben-free to reduce the chance of irritation, and packaged in a 500ml pump bottle for the tabletop or a convenient pocket or purse friendly 50ml Handypack. PrimeOn™ Hand Sanitiser provides rapid disinfection and cleansing of hands on the go without the need for water.

Application:

PrimeOn™ Sanitiser, as an alcohol-based hand rub, should be utilised in situations where hands are visibly clean, and should be a part of all hand hygiene routines⁸. When used correctly, alcohol-based hand rubs are more effective than both medicated and non-medicated soaps⁹. Alcohol-based hand rubs also require less time to use, are more cost effective and cause less irritation to the skin¹⁰.

Moisturiser

REJUVENATE

- Colour-free
- Fragrance-free
- Paraben-free
- Scientifically formulated with Colloidal Oatmeal, Coconut Oil and Beeswax to aid rejuvenating your skin
- 100% recycled/recyclable 500ml bottle

Description:

PrimeOn™ Moisturiser helps users maintain soft, hydrated hands while also adhering to infection protocols. Our formula is fragrance- and colour-free to minimise irritation, enriched with naturally-derived ingredients such as Colloidal Oatmeal, Coconut Oil and Beeswax to soothe, nourish and moisturise your skin.

In our continual commitment to reduce/reuse waste and to provide a better environment for future generations, the 500ml bottle is made from 100% recycled post-consumer material and is completely recyclable.

Application:

For best results, PrimeOn™ Moisturiser should be applied three times daily. Intact skin is the first line of defence against infection; if skin is damaged, it can harbour higher numbers of microorganisms, and increase the risk of transmission to others¹¹. Applying PrimeOn™ Moisturiser helps replace the natural moisturising agents present in the skin, which may be stripped away through repeated hand washing and sanitising.
