Introduction

We are thrilled to unveil our latest breakthrough in healthcare solutions - a comprehensive range of sharps disposal containers, meticulously crafted to meet the rigorous demands of the medical field. From Mun Australia comes a line of products designed to elevate safety, efficiency, and convenience in healthcare settings across the nation.

Our sharps disposal containers are sourced from a renowned manufacturer with over four decades of unparalleled experience in plastic injection moulding. As a leader in the industry, this manufacturer has continually pushed the boundaries of innovation, setting the benchmark for excellence in medical waste management.

With a steadfast commitment to quality, this manufacturer offers a diverse array of containers tailored for the safe disposal of special hospital waste. Their extensive industry knowledge, coupled with a dedication to precision engineering, ensures that each product meets the highest standards of performance and reliability.

At Mun Australia, we take pride in partnering with this manufacturer to deliver a range of solutions that prioritise safety, sustainability, and compliance. From customisable services to the utilisation of top-quality materials, every aspect of our sharps disposal containers reflects this manufacturer's unwavering dedication to excellence.

Moreover, their rigorous adherence to product certifications underscores their unwavering commitment to regulatory compliance and customer satisfaction. Rest assured, when you choose our range of sharps disposal containers, you're choosing a product backed by a legacy of expertise and reliability.

Discover the difference with Mun Australia's new range of sharps disposal containers - where innovation meets excellence, and safety comes first.

**Developed and
manufactured to ISO9001
quality standards**

PBS ECO Series

The PBS ECO series of cylindrical disposable containers is made from up to 75% recycled plastic. The different shaped indents on the lid ease the disposal and the removal of needles, while the flaps on the lid prevent the accidental outflow of the sharp contents. All models have an easy to use temporary and permanent closure and all are available with a carrying handle. All PBS ECO sharps disposal containers are certified compliant to sharps container standard ISO 23907-1:2019, on which the Australian/NZ standard AS/NZS 23907:2023 is based.

1 PBS 2L ECO

CODE: PBS2LECO

- Cap Opening - narrow end for temporary closure, wide end for permanent closure
- 75% Recycled Plastic
- Ergonomic Handle
- Safety wings to help prevent accidental spillage of contents
- 21.5x14 (dia) cm
- Quality designed and manufactured in Italy

2 PBS 5L ECO

CODE: PBS5LECO

- Cap Opening - narrow end for temporary closure, wide end for permanent closure
- 65% Recycled Plastic
- Ergonomic Handle
- Safety wings to help prevent accidental spillage of contents
- 19.5x21.4 (dia) cm
- Quality designed and manufactured in Italy

3 PBS 7L ECO

CODE: PBS7LECO

- Cap Opening - narrow end for temporary closure, wide end for permanent closure
- 65% Recycled Plastic
- Ergonomic Handle
- Safety wings to help prevent accidental spillage of contents
- 19.5x25 (dia) cm
- Quality designed and manufactured in Italy

CS PLUS ECO Series

The CS PLUS series of sharps disposal containers is made from up to 60% recycled plastic, with an integral flap-style with both temporary and permanent closure and a wide opening for the disposal of larger or odd-shaped material. An innovative hinged one-way flap allows easy single-handed disposal of sharps yet prevent the accidental outflow of contents. The CS PLUS range includes containers from 2 L to 22 L; the larger sized containers are especially suitable for the disposal of cannulas and long needles. All CS PLUS ECO sharps disposal containers are certified compliant to sharps container standard ISO 23907-1:2019, on which the Australian/NZ standard AS/NZS 23907:2023 is based.

1 CS Plus 2L ECO

CODE: CSP2LECO

- Flip Top Opening

- Flip Top Opening
- 60% Recycled Plastic
- Shaped slots for syringe needle and insulin pen needle
- Easy single-handed handling for temporary opening, press firmly for permanent closure
- Handle for easy transport
- 37.5x27.2x34.5cm
- Quality designed and manufactured in Italy

Pocket

The POCKET line presents a single use container for both sharps and cutting waste disposal. The Pocket container is equipped with a patented double opening system and can be used by just one hand. The double opening includes one side with needles and insulin pen removal device, and the other side with a large opening for entire syringe or other sharps item disposal.

The Pocket range offers attractive styling, innovative and secure usability for a personal sharps disposal unit, and is a flat design which allows easy transportability and fitment in bags or pouches amongst a user's medication (eg insulin pen, syringes etc) in comparison to the more utilitarian designs currently available.

1

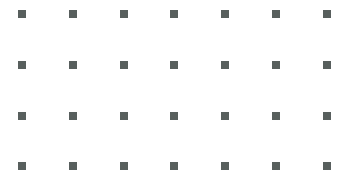

0.4L Pocket

CODE: POCKET04L

- Twin Flap Opening - permanent closure with a firm press
- Ergonomic Shape, flat design to better fit in pouches or bags
- Double opening includes needles and insulin pen needle removal device
- 16.5x12.4x6.3cm

Our waste containers can be combined with different types of accessories to make their usage more comfortable and efficient.

1 L Resin Bracket

CODE: 2901400

- Designed for easy wall-, trolley- or pole-mounting
- Secure sliding attachment at base of container, clicks into position
- Suits PBS ECO 2L, CS PLUS ECO 2L and 5L

2 Bracket Medium

CODE: 2900800

- Sturdy and durable coated metal design attaches to wall, pole or trolley
- Suits PBS 5L

3 Bracket Large

CODE: 2900900

- Sturdy and durable coated metal design attaches to wall, pole or trolley
- Suits PBS 7L

ESG Initiatives

Environment

We believe that our business depends on the environment and we have the power decide how our business affects our environment. At Mun Australia, we pledge to abide by all environmental laws and regulations in Australia and New Zealand, as well as the requirements outlined in the ISO 14001 environmental management system to create a sustainable environment.

Partnerships

At Mun, where we take great pride in being a valued member of the Sedex and APCO organisations. We prioritise ethical practices and sustainability in everything we do.

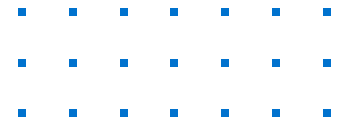

Modern Slavery

Mun has submitted a Modern Slavery statement to the Australian Border Force registry outlining its commitment to constant review and remedy of modern slavery risks within its operations and supply chain. Mun is continuing its roll out of Service Level Agreements (SLA) which contain clauses requiring suppliers to abide by local labour laws and not engage in activities within their operations that would violate human rights such as forced or child labour.
